

Lash Extensions Informed Consent

Performed By: _____

Name: _____

I understand that Eyelash Extensions are an optional, cosmetic service that I have requested to appoint. Individual response to the product ingredients may differ. If I experience any discomfort or concern during the procedure, I will advise the practitioner immediately. I will not hold Nouveau Medispa or any of their employees, owners or practitioners responsible for any ill effects that may result from partaking in this optional cosmetic service. Although all treatment products and instruments are handled with the greatest care to conduct a hygienic and safe service, it is still possible to experience eye irritation that could possibly lead to infection or allergic reaction. If after any Eyelash Extensions appointment, I feel burning, itching, discomfort to the eye or present swelling of the eyelids, I understand it is my own responsibility to seek medical help from an ophthalmologist at my own expense and without delay. I understand that my eyelash extension technician is not a medical professional and cannot accurately assess or diagnose conditions and/or injuries of the eye. Precise aftercare instructions have been given me before (as well as during and after) today's procedure. Following these instructions for cleaning and caring for my eyelash extensions will ensure the best, most durable and hygienic results. I have been advised to and instructed to wash, rinse, and dry my eyes, eyelids and eyelash extensions every night before sleep, including on initial visit or any/every lash touch-up appointment. Using mascara on a regular basis can shorten the length of time my extensions stay in place. If I choose to use mascara, I stand advised that only water-based mascara should be applied, and only to the tips. I agree never to use waterproof mascara or eyeliner while wearing eyelash extensions. Even with strict adherence to these precautions and care instructions, it is impossible for the practitioner to predict or guarantee how long my eyelash extensions will last. Too many variables, including growth cycles, use of cosmetic skin care products, and the overall care given will influence how long and well my extensions last before retouch visits are required. I will not rub my eyes, pull, twist or tug at the lashes, but will treat them with gentle care and daily cleansing as advised. I will pay for today's and any future service in full immediately after the visit concludes. I understand there are NO REFUNDS given for eyelash extension services. Within 48 hours of an initial set application, if I wish to have them removed for any reason, I may request to have them professionally removed at no cost. After 48 hours of the initial application visit, I agree to pay a removal fee of \$_____ if I appoint an eyelash extension removal.

Photos will be taken to document today's (and any future) service. These remain property of Nouveau Medispa and their use may include publication on our website, social media pages and such to show the before and after results of your technicians' work. I have read and have been given an opportunity to discuss any of these points of interest or any further questions I have with my Nouveau Medispa Eyelash Extensionist.

Eyelash Extensions Aftercare

To get the best results of your eyelash extensions, please follow the instructions below:

- No tugging, pulling, twisting, or playing with the eyelash extensions.
- No use of oil base make up or make up remover around the eye area.
- No use of sauna, steam room, or hot tubs within the first 48 hours after procedure.
- No use of any over-the-counter mascara. Mascara should not have to be used, if lashes are kept clean and taken care of gently. If you feel you need mascara, please consult with your provider.
- No use of eyelash curlers.
- When washing the face, be gentle around the eye area. When lashes become wet, use a paper towel to remove excess water. When dry, comb through as usual with your eyelash brush given to you from technician.
- If you are going to receive a facial, you must let your esthetician know you have eyelash extensions.
- Within the first 24 hours, it is normal to lose a few lashes. The natural lash life cycle is between 60-90 days. During this time, with or without eyelash extensions, you could lose 1-5 lashes per day.
- When sleeping, do not wear an eye mask or lay on your face, as this could change the position of the lash.

Extension fills, or touch-ups, should be done regularly every 2-3 weeks. The longevity of your eyelash extensions could extend by following the above post instructions. Please contact your provider with any questions or concerns.
