TRANSFORMING APPEARANCES

Have you been exercising to get rid of the extra baggage you have been lugging around your midsection, thighs, butt, arms or facial regions? Can't seem to lose those last few stubborn pounds? You may have looked into liposuction or other body contouring services but found them to be too invasive, too scary or too expensive. With the advances in technology, body contouring is now easier than ever thanks to Exilis.

BODY CONTOURING

WRINKLE REDUCTION

SKIN TIGHTENING

ANTI-AGING

## Who is this procedure right for?

The Exilis treatment is safe for patients of all ages who are showing signs of aging, are up to 20-30 lbs. over weight, or want to improve those problem areas where exercise and diet have plateaued. This is an option for those who desire aesthetic improvement without the cost and recovery time of surgery.

## How many treatments do I need?

The recommended number of treatments is between 4 to 6 sessions over the course of a few weeks. Treatments are usually scheduled 7 to 10 days apart and patients have reported results as soon as a few days.

## What kind of results can I expect?

Results may vary. Some patients have reported anywhere from 1 to 4 inches lost after the recommended treatment sessions. For best results it is recommended to practice light to moderate exercise, such as walking, along with following a healthy diet and drinking plenty of water.

## How long do results last?

Patients have shown results to last while maintaining a healthy lifestyle. Please consult your Board Certified doctor for further details.
