CYNOSURE

Stop concealing your skin's imperfections and get the glowing results you desire.

Skin revitalization is a nonsurgical treatment that will improve your skin's appearance, quickly and easily. This advanced light-based technology clears undesirable brown spots, sun damage and vessels, revealing clearer skin.

How does it work?

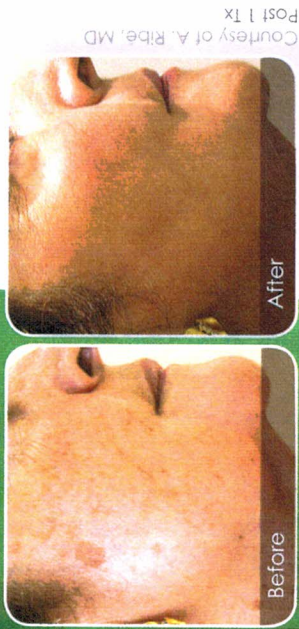

Specialized pulses target brown spots, sun damage and vessels without harming the surrounding skin. The light delivered to your skin causes them to slowly disappear through your body's natural healing process.

What results can I expect?

Expect to see a decrease in the appearance of brown spots, sun damage and vessels for a more even skin tone*. A series of treatments may be needed for desired results.

Treatment plans can be adjusted to fit everyone's lifestyle – speak to your provider regarding desired downtime, comfort, and results.

Schedule your treatment session today.
